

TORCH[®] XTREME

**DE-ICER
DESIGNED FOR TEXAS**

« ** Effective down to* **-20°** »

* -20° based on Eutectic freeze point

Stay in front of the storm with confidence.

Pretreating with Torch removes potential accumulation of snow and ice for an extended period of time.

Gets the job done fast! Gets the job done right!

TORCH Xtreme is a magnesium chloride combined with calcium, sodium, and potassium chlorides. It is a high purity product that is screened and doesn't contain inert product that doesn't aid in the melting process. TORCH Xtreme is kiln dried, has a proprietary anti-corrosive additive, and contains less than 1% total moisture. This low moisture content results in a free flowing product from stockpiles, bulk super sacks, and application equipment. The product is naturally colored, which helps in the application process, and enhances the energy absorption process from the sun.

Say Goodbye to Bricking

TORCH Xtreme is stored in our Envirotx super sacks, which contain a waterproof lining. This prevents bricking, allows TORCH to be stored indoors or out for long periods of time, and loads easily to spreaders.

Faster Results

TORCH Xtreme starts the melting process within seconds of application, proving instant visual results.

Lower Temperatures

A complex chemical makeup allows TORCH Xtreme to effectively work at a much lower temperature than traditional granules.

- What is TORCH Xtreme made of?

TORCH Xtreme is a magnesium chloride combined with calcium, sodium, and potassium chloride. The product also contains a proprietary anti-corrosive additive.

- Where can I store it?

Our product comes in a waterproof-lined super sack, preventing majority of nature's degrading effects. This means you can store TORCH Xtreme indoors or out, it will not brick, and still have a free flowing, smooth application.

- How long should I wait until TORCH Xtreme begins to melt snow or ice?

The melting process starts within seconds of applying the products, so you could say it works instantly!

- What sets it apart from any other regular de-icer?

TORCH Xtreme is built for the coldest of colds, and has been shown to work in temperatures as low as -20. Also, our product can be stored wherever you find it fitting, without having to worry that it will lose its quality or lower its performance, and it won't brick up!

- Can I use TORCH Xtreme as a Pretreatment?

Of course! Pretreating with TORCH Xtreme removes accumulation of snow and ice for an extended period of time.

- Where can I purchase TORCH Xtreme?
