Truck Mounted Raven 440 Computer Spray Applicator System

Spray applicator for BIORESTOR® Asphalt Rejuvenator includes everything to begin treating your asphalt yourself!

Truck Mounted Raven 440 Computer Spray Applicator unit includes the following Raven 440 System which allows for 3 separate spray boom controls- allowing for a left and right control for shoulders or driveway approaches to be added on the run with the flip of a switch, and all with the same rate of application. The Raven controller helps with exact spray but it can only handle + or - 2 mph over the design rate programmed into the start of system. The system still desires a stable operating speed for proper rate of application. The controller head will be wired in with installation- an upright floor mount is not priced into this system due to the vast number of variables that may be encountered.

All kits include reliable Honda engines equipped with electric start. They are attached to an Ace centrifugal pump plumbed and ready to spray with spray bar; tips; caps; filters; hose suction/discharge; mixing device and all seals and rubbers as well as extra wear parts. Kit includes but is not limited to:

- Complete motor and pump
- 13 feet total spray bar with wind curtain
- Two folding wings to allow for an 8 feet wide traveling width
- 50 feet of hand wand for tight areas and touch up work
- Stainless steel mixer to agitate and thoroughly mix product (right angle drill not included)
- Transfer hose for product transfer form one tote container to another
- Empty tote for initial dilution (1:1) for emulsified BIORESTOR® Asphalt Rejuvenator

Additional parts included are 30 red spray tips for standard road treatment, 5 white tips for construction joint treatment, 1 extra pump seal, and extra Viton gaskets.

A parts list will be included with individual part number for ease of replacement or broken pieces.

If replacement parts are needed contact the system builder H & B Products St Mary's Ave Sidney, Ohio 45365
Drawings available for part and piece order
